Desalination Specialists

Proudly Australian owned, MAK Industrial Water Solutions specialise in Reverse Osmosis (RO) desalination water treatment equipment. We design and build equipment tailored to client's individual requirements and provide 24/7 maintenance support, to ensure consistent and reliable water supply.

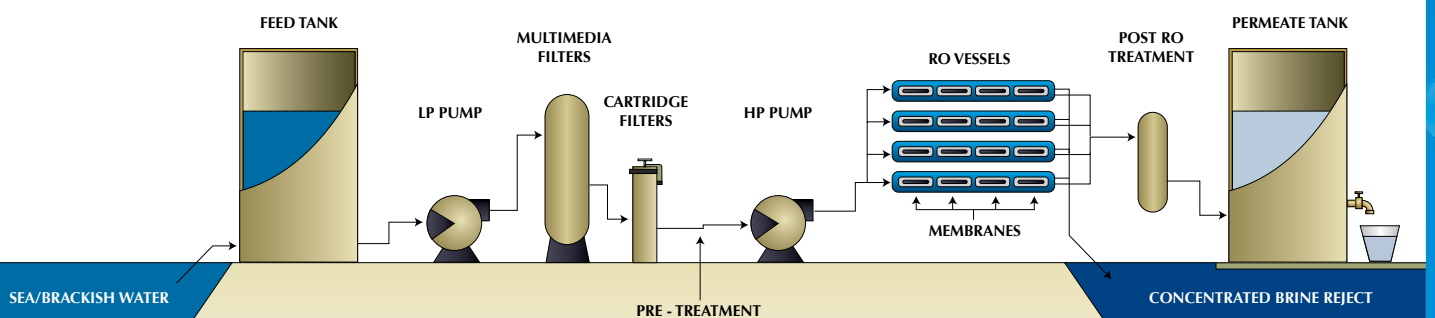

MAK offer Reverse Osmosis unit design reviews and upgrades to increase system output and efficiency, keeping your running costs to a minimum. By choosing MAK Industrial Water Solutions, you will benefit from the extensive knowledge and expertise of our engineering design team with experience in chemical processing, mining and oil & gas industries.

Services Provided

- Design and supply of RO water treatment plant
- Hire of RO water treatment plant
- Turn-Key water treatment solutions
- BOO / BOOT capabilities
- Servicing and maintenance of RO equipment
- Facility Management
- Plant audits
- Plant upgrades
- Onsite and remote training
- 24/7 emergency support

RO Desalination Process

Applications

- Desalination of sea water for drinking water
- Purification of bore/brackish water for drinking water
- Treatment of waste water streams for recycling
- Demineralisation/purification of scheme water for use in high purity applications such as boilers, laundry equipment, hotel kitchen appliances, steamers, dishwashers, cooling towers and disinfection systems in hospitals, etc.

The MAK Advantage

When you purchase MAK water treatment equipment, you'll benefit from:

- Value for money solutions
- Locally designed and manufactured plant built to your specifications
- Superior service levels, delivering reliability throughout the life of your water treatment equipment
- Fully stocked warehouse with specialised parts and consumables
- 24/7 response with service and parts
- Access to major global suppliers who meet our strict criteria for quality, consistently delivering continuity of supply
- Our team of highly skilled engineers & service technicians to provide support, training and service
