Waste Water Treatment Specialists

With offices in Western Australia and Queensland, MAK Water is a proudly Australian owned company specialising in packaged waste water treatment plants designed for both urban & remote locations.

Sewage treatment plants capable of treating effluent to “Class A” are designed, constructed and maintained by MAK specialists. 24/7 maintenance support is available Australia wide.

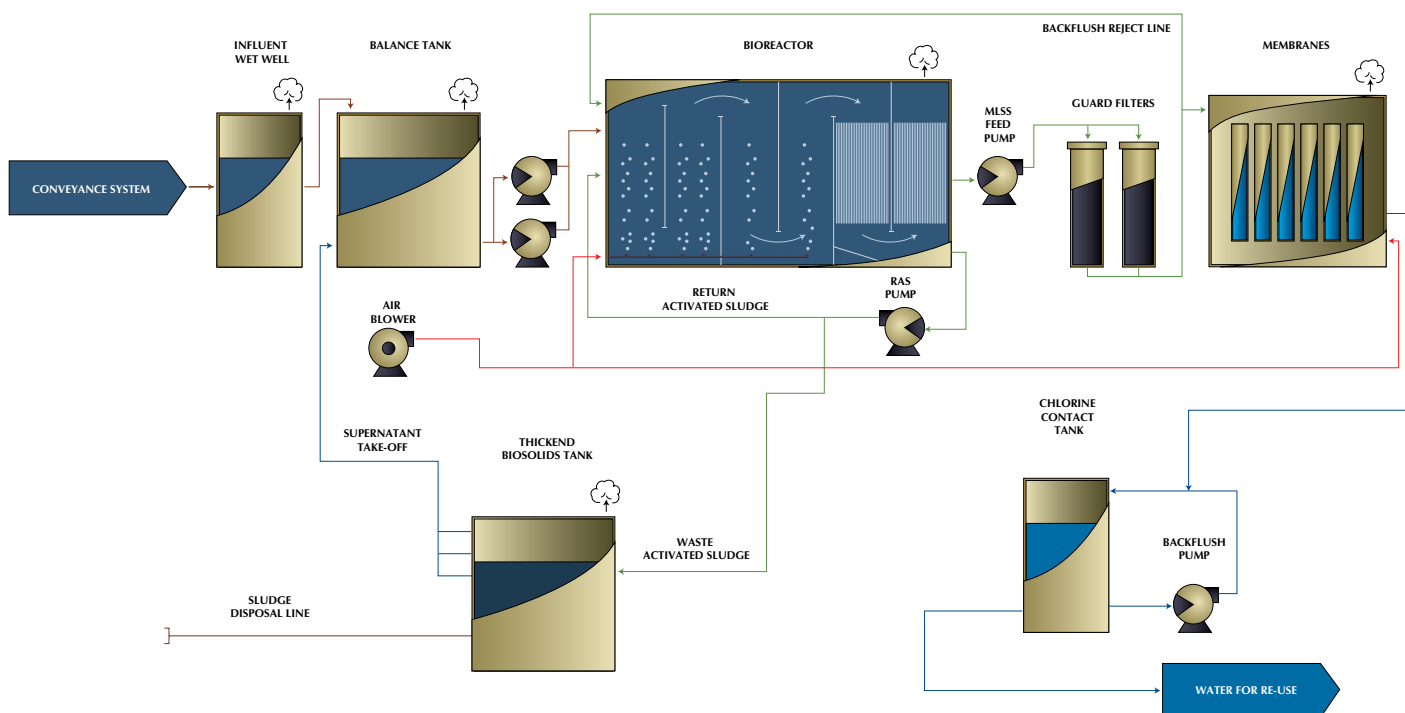

All MAK plants are pre tested and run up prior to delivery to site. Commissioning and validation for compliance to the current Australian guidelines is provided.

Services Provided

- Design and supply of sewage treatment plants
- Supply of industrial water treatment plants
- Removal of bacteria for reuse and process water
