

## Environmental Policy

***MAK Water is committed to leading the industry in minimizing the impact of its activities on the environment.***

The key points of its strategy to achieve this are:

- Minimize waste by evaluating operations and ensuring they are as efficient as possible.
- Minimize toxic emissions through the selection and use of its treatment chemicals.
- Design and manufacture equipment with high efficiencies to reduce power consumption and increase recovery of limited resources.
- Develop and promote recycling solutions for its customers and suppliers.
- Source and promote a product range to minimize the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.
- Work with our clients to achieve their greenhouse compliance requirements.
